

# Powering Data Insights

## IMGS DATA INTELLIGENCE PLATFORM

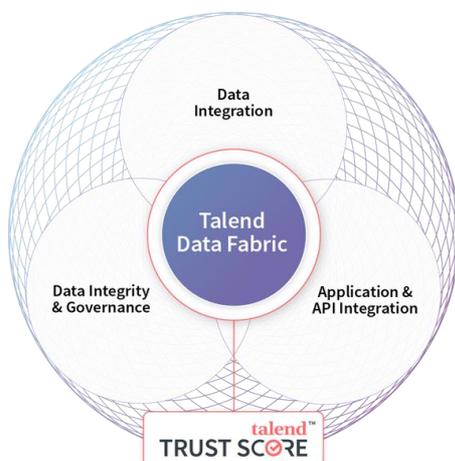

The IMGS Data Intelligence Platform provides a 360-degree data solution, delivering a full range of data services from integration to data warehousing and analytics.

Wherever you are in your data journey, IMGS have the expertise and range of solutions to deliver data that you can trust. To bring best-in-class data intelligence solutions to market, IMGS have partnered with 3 Gartner recognised, leading companies in their fields:

### Talend

Talend helps businesses accelerate to a modern, healthier data environment. The unified Talend Data Fabric is the only platform that seamlessly combines an extensive range of data integration and governance capabilities designed to manage the health of corporate information.

In its most recent release, the platform continues to advance analytics, security, and collaborative governance across the enterprise, supporting greater confidence and the ability to get more value from an organisation's data.

## Powering Data Insights

### Sisense

Sisense goes beyond traditional business intelligence by providing organisations with the ability to infuse analytics everywhere, embedded in both customer and employee applications and workflows. Sisense customers are breaking through the barriers of analytics adoption by going beyond the dashboard with Sisense Fusion – the highly customisable, AI-driven analytics cloud platform, which infuses intelligence at the right place and the right time, every time.

### Snowflake

Snowflake enables every organisation to mobilise their data with Snowflake's Data Cloud.

Customers use the data cloud to unite siloed data, discover and securely share data, and execute diverse analytic workloads. Wherever data or users live, Snowflake delivers a single data experience that spans multiple clouds and geographies creating a solution for data warehousing, data lakes, data engineering, data science, data application development and data sharing.

Snowflake combines the power of data warehousing, the flexibility of big data platforms and the elasticity of the cloud at a fraction of the cost of traditional solutions.
