

Powering Data Insights

Sisense Data Analytics Platform
Infuse Data Analytics Everywhere

With the Sisense Data Analytics Platform, build custom analytic experiences for everyone and embed actionable intelligence everywhere. Infuse Sisense Data Analytics to unleash the power of your data and transform the way you work, enhance your customers' experience, and grow your business.

Custom Analytic Experiences for Everyone:

- **Simplify data analysis:** Unlock data from cloud and on-prem, so everyone can analyse data to drive better outcomes.
- **Build customised experiences:** Create custom data experiences and automate multistep actions to accelerate workflows.
- **Evolve your business:** Agility at scale with an open cloud platform extended through deep tech partnerships.
- **Infuse intelligence everywhere:** Integrate AI-powered analytics into workflows, processes, applications, and products.

Sisense Fusion:

Harness the power of analytic infusion with the leading cloud analytics platform. Sisense Fusion is one of the top AI-driven embedded data analytics platforms, that infuses intelligence at the right place and the right time, every time.

Powering Data Insights

Transform Your Business from the Inside Out By Infusing Analytics Everywhere

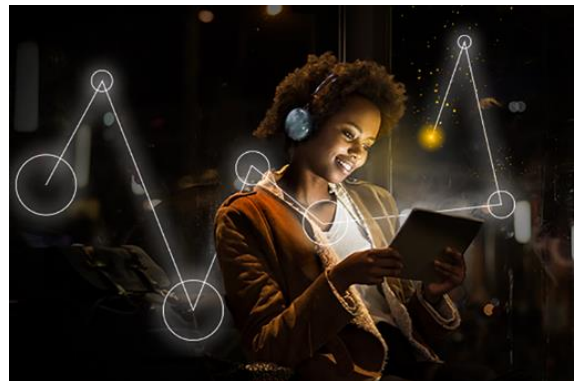

Infuse Analytics for Business

Drive better decision-making by infusing intelligence into your business applications, workflows, and processes. Move beyond standard business intelligence and empower everyone across your organisation, by infusing intelligence into workflows and processes that accelerate business growth.

With analytics for your business, you have one analytics platform to answer ALL business questions, no matter how complex.

Sisense Embedded Analytics for Your Customers

Go beyond delivering standard customer dashboards to seamlessly infusing AI-powered intelligence into your products — with fast time-to-market, complete customisability, and full control, for impact you can measure.

Embedded analytics for your customers, is the API-first analytics platform that infuses fully white-labelled and customised analytic experiences into customer applications and workflows at scale.
