

Powering Data Insights

Snowflake Data Cloud A Single Global Platform for Your Data and Your Essential Workloads, with Seamless Data Collaboration

Whether you're a business or technology professional, get the performance, flexibility, and near-infinite scalability to easily load, integrate, analyse, and securely share your data. Snowflake is a fully managed service that's simple to use but can power a near-unlimited number of concurrent workloads.

Wherever data or users live, Snowflake delivers a single data experience that spans multiple clouds and geographies creating a solution for data warehousing, data lakes, data engineering, data science, data application development and secure data sharing.

From a Single Platform, Snowflake Enables Your Most Critical Data Workloads

Snowflake combines the power of data warehousing, the flexibility of big data platforms and the elasticity of the cloud at a fraction of the cost of traditional solutions.

Snowflake Cloud Data Platform provides the near-zero maintenance infrastructure that enables organisations to analyse massive amounts of near real-time data, increase their customer base, delight current customers, and develop new solutions, while only paying for what they use!

Powering Data Insights

One Platform that Un-Locks Near Unlimited Data Opportunities

 <p>Optimal Performance for Any Workload</p>	<p>Snowflake’s single elastic performance engine delivers instant and near-unlimited scale. Support a virtually unlimited number of concurrent users and workloads —all with reliable, fast performance.</p>
 <p>Fully Automated So You Can Harness (Not Manage) Data</p>	<p>Trade in manual management and maintenance for automations that enable you to easily operate at scale, optimise costs, and minimise downtime.</p>
 <p>Collaborate, Globally and Securely</p>	<p>Easily and securely access and share a single copy of your data across your departments, business units, and subsidiaries; with your supply chain and other business ecosystem partners; and with thousands of organisations that comprise the Data Cloud.</p>
