## Streamline Your Data Management with the Data Validation Portal

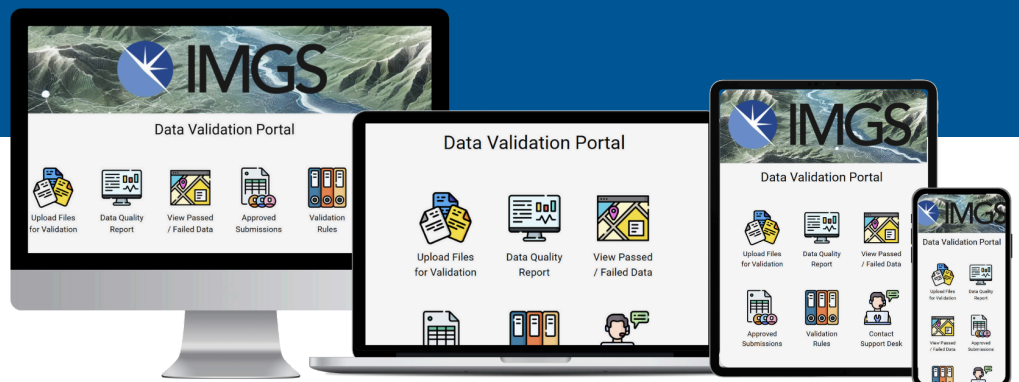

For utilities and government agencies, managing data submissions from contractors and third parties can be a daunting task. Inconsistent data quality often results in inefficiencies, delays, and increased operational costs due to manual data checks and corrections.

### Introducing the Data Validation Portal:

Our modern solution, powered by FME, automates the data validation process, enabling contractors to upload their data for validation before submission. This ensures that all data adheres to your business standards and compliance regulations, significantly reducing manual data processing tasks and enhancing data integrity.

### ● Solution Highlights:

- User-Friendly, Web-Based Interface
- Automated Data Validation & Quality Assurance
- Customisable Validation Rules and Reports supported by an Audit Log

### ● Core Advantages:

- Supports GIS, CAD, BIM, Files and hundreds of Formats
- Seamless Integration with Existing Enterprise Systems
- Deploy Anywhere – On-Premise, Cloud, or Hybrid
